

Carpool Frequently Asked Questions

I have a car and want to save money going to work. How can UTA help me?

UTA can help you arrange a carpool with neighbors going to the same places you are going. This can be to work, colleges, shopping or even one-time only events. You can share rides with people and reduce the number of trips your vehicle needs to take, saving you money, along with wear and tear on your vehicle.

UTA's free Ridematch system makes it easy to find people to Carpool. Using Google Maps, Ridematch gives you a list of people interested in sharing a ride who have similar commutes.

You can now find matches for your occasional non-commute trips. Try the "My Trips" option.

Visit utacommuter.com today to find your match!

What if I don't have a match?

Your information will remain in our database until you choose to remove it or mark it as inactive. We will email you when a new match is made. Be sure to check back periodically for new matches or if your commute changes. Having your information in the system allows others to find you when they need Carpool matches.

Can I meet a Carpool match somewhere other than my home?

Absolutely! UTA has over 150 Park & Ride lots along the Wasatch Front that are designed for commuters to meet their Carpools, Vanpools or buses. To see our where we have Park & Ride lots, click [here](#).

Can I use the HOV lanes if I have a Carpool?

As long as you have 2 or more people in your car, you can take the High Occupancy Vehicle (HOV) lanes. Always follow all applicable traffic laws related to HOV lanes and driving in general.
